

Step 2

Place 2 different green print A's right sides together. Draw a line from corner to corner on the lighter fabric and then sew $\frac{1}{4}$ " out on both sides of the line. Cut along the line and press open to make 2 units. Then cut again from corner to corner. Repeat with 6 more A's, you will have 3 pairs. Mix the units, join to make the quarter-square triangles. You will need only 7 units, so you will have 1 left over.
